

TRADEX

with Jobmaster

Highlights:

- ▶▶ Enables **rapid** electronic document **exchange**
- ▶▶ Access to **existing community** of integrated suppliers
- ▶▶ Proven **return on investment**
- ▶▶ **Eliminates** paper trading documents and re-keying
- ▶▶ **Bank-level security**
- ▶▶ Developed **in conjunction** with **HM Revenue** and **Customs**
- ▶▶ Unique business **process support**

When integrated with your Jobmaster solution, Tradex eases the burden of processing invoices by removing the need for manual rekeying of data. Tradex membership also grants access to a growing community of suppliers, capable of rapidly transform accounts receivable processing.

invoice receipt

Not only can Tradex automatically vet incoming supplier invoices against purchase orders raised on Jobmaster, it also automatically returns those that fail to correspond with a valid purchase order, without entering invalid invoices into the Jobmaster system. This ensures only accurate and complete invoices are accepted, encouraging best practise and vastly reducing the number of queries and inconsistencies.

Invoices that are complete and valid are automatically imported into the Jobmaster system, via the Tradex FTP server, and reside in the system as normal. For the purposes of enquiries and reporting, all invoices that enter the Jobmaster system via Tradex can be identified as such.

All Jobmaster invoice-matching programmes also allow the user to select virtual 'stacks' of Tradex-registered purchase invoices, by configured options including supplier, branch and project. Along with any attachments, each invoice can then be viewed and approved, either line-by-line or overall, with a single screen including orders and deliveries. No matter where they are in the system, whenever Tradex purchase invoices are referenced, they can be viewed and reported on, along with any attachments received via Tradex.

universal solution

The connection between your Jobmaster application and Tradex is simple to implement and will connect you with your supply chain partners. For suppliers not already using Tradex, there is a wide range of connection options available, ranging from free online access to fully customised interfaces. A truly open trading community, customers and suppliers of all sizes can engage in eTrading using Tradex. A long-term and sustainable solution, the benefits of connecting to Tradex can be achieved within days.

Developed in conjunction with HM Customs and Revenue, Tradex has passed penetration testing commissioned by a high street bank. Tradex has been adopted by companies of all sizes and gained a high reputation for customer service, having been voted eCommerce Product of the Year by Construction Computing in both 2009 and 2010.

next step

Learn how you too can benefit from adding a Tradex connection to your Jobmaster solution, by contacting a member of the Tradex team.

// A transaction that would have taken 10 – 30 minutes to locate manually now takes less than 1 minute in Tradex.
