

TRADEX & Vixen

Highlights:

- ▶▶ Enables **rapid** electronic document **exchange**
- ▶▶ Access to **existing community** of integrated suppliers
- ▶▶ Proven **return on investment**
- ▶▶ **Eliminates** paper trading documents and re-keying
- ▶▶ **Bank-level security**
- ▶▶ Developed **in conjunction** with **HM Revenue** and **Customs**
- ▶▶ Unique business **process support**

Proven, scalable and community-centred, Tradex enables the exchange of electronic trading documents between supply chain partners, without the need for paper trading documents or manual rekeying. Featuring an industry-leading breadth of functionality, Tradex integrates seamlessly with existing IT systems, to reduce the cost of transaction processes and the impact these processes have on the environment.

Tradex with Vixen

When integrated with your Vixen solution, Tradex eases the burden of processing purchase orders and invoices. With access to the growing community of suppliers already using Tradex, buyers can rapidly transform accounts payable processing.

invoice receipt

Tradex can automatically vet incoming supplier invoices against purchase orders raised on Vixen. If an invoice fails to correspond with a valid purchase order, it will be automatically returned, without being entered into the Vixen Purchase Ledger Invoice Register.

All Vixen purchase order and invoice matching programmes allow the user to select virtual 'stacks' of Tradex-registered purchase invoices, by configured options including supplier, branch and project. Along with any attachments, each invoice can then be viewed and approved, either line-by-line or overall, with a single screen including orders and deliveries. No matter where they are in the system, from the Purchase Ledger register to the cleared history, Tradex purchase invoices can be viewed, along with attachments received via Tradex, whenever they are referenced.

sending purchase orders

In the standard Vixen purchasing model, Tradex automates the transfer of outgoing purchase orders to suppliers and subcontractors, whether or not they are on Tradex. The buyer no longer has to post, fax or email documents and the supplier no longer has to interpret fax documents, wait for the post or re-key order details. In this model, Tradex handles all purchase orders for direct and indirect costs.

In the full online Vixen purchasing model, Tradex can ensure no printed or signed copy is required at any stage. In this full model, Tradex can handle every kind of Vixen purchase order, from automatic depot stock replenishment and mobile purchases to those raised against full estimate requisitions.

universal solution

The connection between your Vixen application and Tradex is simple to implement and will connect you with your supply chain partners. For suppliers not already using Tradex, there is a wide range of connection options available, ranging from free online access to fully customised interfaces. A truly open trading community, customers and suppliers of all sizes can engage in eTrading using Tradex. A long-term and sustainable solution, the benefits of connecting to Tradex can be achieved within days.

Developed in conjunction with HM Customs and Revenue, Tradex has passed penetration testing commissioned by a high street bank. Tradex has been adopted by companies of all sizes and gained a high reputation for customer service, having been voted eCommerce Product of the Year by Construction Computing in both 2009 and 2010.

next step

Learn how you too can benefit from adding a Tradex connection to your Vixen solution, by contacting a member of the Tradex team.
